APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 48966 is issued subject to the terms and conditions imposed in said Permit 48966 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Any well drilled under Permit 48966 shall be plugged in accordance with the Nevada Administrative Code, Chapter 534.420, "Regulations for Water Well and Related Drilling" within 60 days from the issuance of this permit.

The total combined duty of water under Permits 62508, 62509, 62510, 62872 and 62873 shall not exceed 68.34 acre-feet annually.

This permit is issued for the non-consumptive use for recreational purposes, therefore no consumptive use of water is allowed by the issuance of this permit.

This permit is issued subject to the State Engineer's oral ruling of January 14, 1987 with the understanding that any consumptive use that may occur as a result of the recreational use under Permits 62872 and 62873 will have to be accounted for under Permits 62508 and 62509.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.5 cubic feet per second.

Work must be prosecuted with reasonable diligence and be completed on or before:
